A GRADUAL COMMITMENT PROCESS

The Ecoproduct Charter is both a framework and a guide to support the gradual implementation of a comprehensive eco-friendly approach.

The Charter is a comprehensive approach that seeks to :

- ☀ **Reduce** the consumption of raw materials and energy ;
- ☀ **Integrate** green building standards requirements into real estate projects ;
- ☀ **Control** waste through repurposing or recycling ;
- ☀ **Opt** for eco-certified products that incorporate environmental criteria ;
- ☀ **Limit** and optimise travel ; promote the use of public and non-motorised transport ; optimise and upgrade vehicle fleets ;
- ☀ **Integrate** this dynamic into interactions with customers and suppliers over time.

A responsible self-assessment process

Your commitment begins by filling out an online questionnaire on the Ecoproduct website. It will help you evaluate your company and identify the starting point of a comprehensive eco-friendly approach.
